Use of carrier's containers:

- The service of container provision ends at the moment of container return according to the Contractor's instructions;
- The cost of container provision services for the period of the normative term is included in the cost of freight forwarding services and is reflected in the Acts of rendered services for freight forwarding services as a part of a single rate.
- In case of exceeding the normative period, the Client shall pay the Contractor a fee for excessive use based on the cost of USD 10/20'dc container per day and USD 20/40'hc container per day (including 0% VAT).
- The normative period of use of container is:
 - 7 calendar days from the date of issue of the container to the date of delivery at the port of departure;
 - 10 calendar days from the date of unloading the container from the vessel at the port of arrival to the date of the customs document/telex-release (the later date shall be taken into account);
 - 10 calendar days from the date of arrival of the container at the railway station of destination to the date of return of the empty container by the Client to the Contractor.
- The normative period of container use for local delivery is 10 days.
- Acts and invoices for excessive use are issued upon completion of exceeding the normative period or on the last day of the reporting period. The reporting period is a calendar month.
- The cost of services for the excess use of containers, expressed in foreign currency, is converted into rubles at the exchange rate of the Central Bank of the Russian Federation on the date of the Act.
